GEORGE DAWSON-KESSON

DevOps Engineer | Cloud Architect | Automation Specialist

👩‍💻 About Me

Passionate DevOps Engineer with expertise in cloud infrastructure, automation, and CI/CD pipelines. AWS Certified with hands-on experience in designing and implementing production-grade infrastructure using Infrastructure as Code, containerization, and modern DevOps practices.

🚀 Core Skills

☁️ Cloud Platforms

AWS (Associate Certified)
Infrastructure Design
Cost Optimization

🐳 Containerization

Docker
Kubernetes
EKS Clusters

⚙️ Infrastructure as Code

Terraform
Ansible
CloudFormation

🔄 CI/CD

GitHub Actions
Jenkins
GitOps

📁 Featured Projects

DevOps Automation Platform

Production-ready infrastructure automation with multi-stage CI/CD pipelines, automated security scanning, and comprehensive monitoring. Demonstrates end-to-end DevOps practices.

Terraform | Kubernetes | GitHub Actions | Prometheus | Grafana

Serverless Portfolio Website

This website! Built using AWS serverless architecture with S3, CloudFront, Lambda, API Gateway, and DynamoDB. Fully automated deployment with Terraform.

AWS Lambda | API Gateway | DynamoDB | CloudFront | S3

AWS Well-Architected Infrastructure

Multi-tier AWS infrastructure following best practices for security, reliability, performance, cost optimization, and operational excellence.

AWS VPC | EKS | RDS | CloudWatch | Auto Scaling

🎓 Certifications

✅ AWS Certified Solutions Architect - Associate
